

Personalised care price list for surrogacy

Treatment plans and subsequent costs are tailored to each individual, and will be discussed with your specialist at initial consultation. Our dedicated patient pathway coordinators will be able to assist with all relevant paperwork, appointment bookings and payments. Please refer to our other price list for further treatment options. Common questions are also answered in our FAQ section.

1. All new patients will require an initial consultation.
2. Your consultant will invoice you directly after your appointment for consultation fees.
3. A follow-up appointment is required to initiate further treatment. This appointment will need to be face-to-face if you have not been in contact with your consultant for six months or more.
4. Treatment fees must be paid in full before treatment commences. You will be contacted by the finance team to arrange payment. We reserve the right to cancel any appointment if payment has not been received in full and cleared funds.
5. Treatment will only commence when the purchased donor's gametes are safely in storage at the ACU.
6. Treatment packages do not include purchase or transport of donor gametes. These charges are paid directly to your chosen cryobank and courier, in addition to the import administration fee, paid to Guy's ACU.
7. Please note some screening tests are stipulated by the HFEA and/or EUTD, these are included in your package where applicable.
8. IVF may be changed to ICSI as late as the day of egg collection, if clinically indicated. The difference in cost will be charged accordingly.
9. Following an unsuccessful treatment cycle, a follow-up consultation is free of charge if booked within six weeks of a negative pregnancy test.
10. All treatment costs and packages exclude medication and cryopreservation of surplus eggs, embryos or sperm (unless stated otherwise).
11. All prices are reviewed regularly. Quotes are valid for a period of 90 days post offer, treatment must be paid in full and commenced in this timeframe. Please note, in the event that your treatment plan needs to be amended, your quoted price may change and additional fees may be charged. All changes will be discussed with you.
12. The UK Fertility regulator, the Human Fertility and Embryology Authority (HFEA) require us to pay a registration fee for some cycles (£80). This will be included in your package where applicable.
13. If you cannot attend your consultation or scan appointment, advance notice of 24 hours is required and cancellation fees apply. More information can be found on the Refunds Information Sheet.
14. In the event of treatment cancellation, refunds may be available.
