

Self-funded price list

Assisted Conception Unit

Treatment plans and the subsequent costs, are tailored to each individual and will be discussed with your specialist at initial consultation. Our dedicated patient pathway coordinators will be able to assist with all relevant paperwork, appointment bookings and payments. Please refer to our other price list for further treatment options, including the use of a donor and surrogacy and for pathology. We also have personalised care options for patients who want consultant-led care. Common questions are also answered in our FAQ section.

1. All new patients will require an initial consultation.
2. Your consultation booking is not confirmed until your consultation fee is paid.
3. A follow-up appointment is required to initiate further treatment. This appointment will need to be face-to-face if you have not been in contact with your consultant for six months or more.
4. Treatment fees must be paid in full before treatment commences. You will be contacted by the finance team to arrange payment. We reserve the right to cancel any appointment if payment has not been received in full and funds cleared.
5. IVF may be changed to ICSI as late as the day of egg collection, if clinically indicated. The difference in cost will be charged accordingly.
6. Following an unsuccessful treatment cycle, a followup consultation is free of charge if booked within six weeks of a negative pregnancy test.
7. All treatment costs and packages exclude medication and cryopreservation of surplus eggs, embryos or sperm (unless stated otherwise).
8. All prices are reviewed regularly. Quotes are valid for a period of 90 days post offer – treatment must be paid in full and commenced in this timeframe. Please note, in the event that your treatment plan needs to be amended, your quoted price may change and additional fees may be charged. All changes will be discussed with you.
9. The UK fertility regulator, the Human Fertility and Embryology Authority (HFEA), require us to pay a registration fee for some cycles (£80). This will be included in your package where applicable.
10. If you cannot attend your consultation or scan appointment, advance notice of 24 hours is required and cancellation fees apply. More information can be found on the refunds information sheet.
11. In the event of treatment cancellation, refunds may be available.

--	------

Payable per annum for storage, non-refundable.

Administration charges

Import of eggs, embryos or sperm from another clinic in the UK to ACU*	£250
Import of eggs, embryos or sperm from another clinic outside of the UK to ACU*	£450
Export of eggs, embryos or sperm from ACU to another clinic in the UK*	£150
Export of eggs, embryos or sperm from ACU to another clinic outside of the UK*	£250
Vitrification kit If your gametes or embryos have previously been stored at another clinic using a vitrification system not routinely used at our Assisted Conception Unit, we will need to purchase additional kit to carry out the thawing process safely. This will need to be purchased prior to your treatment starting.	£400

*Please note, this charge is administrative and does not include courier or transportation charges. The above costs do not include storage fees.

Refunds

Occasionally, treatment cycles may need to be cancelled or postponed. In this case, refunds will be available. A charge for services already performed will be applied. Our team will be able to assist you through the refund process.

How to pay

The most convenient way to pay is via our secure online payment portal, which can be found at: www.guysandstthomasprivatehealthcare.co.uk/services/assisted-conception

To discuss alternative payment options, please speak to our private patients customer service team.
